SEPTEMBER 11, 2001

2001 ASUI President Leah Clark-Thomas is comforted after an emotional speech at the candlelight vigil Sept. 12. An estimated 1,200 people attended the vigil that included a procession from the SUB to East City Park and presentations by Clark-Thomas, Moscow Mayor Marshal Comstock and UI President Bob Hoover.

A community mourns

On Sept. 11, 2001, a group of terrorists hijacked four commercial planes and crashed them into the World Trade Center in New York City and the Pentagon in Washington, D.C. A few thousand people lost their lives in the attacks.

The events of that Tuesday morning caused a major shift in the economy and altered the way Americans lived their lives. A war on terrorism was waged. An anthrax scare involving the postal service followed. Airport security increased significantly.

The attacks served as a wake up call. For some, it caused them to keep better contact with the people they care about, to take more chances in life, to be more active.

The University of Idaho and the community of Moscow pulled together to cope with the tragedy.

Students gathered in front of a screen in the food court of the Commons to watch the news as it unfolded. Living groups made posters and banners, which they displayed on their

their halls. The residence halls organized a candle light vigil in front of the library to pray for the victims and for the nation.

Students joined the community in a candlelight peace march from campus to Eastside Park. The ASUI and student volunteers made and sold ribbons, raising more than $9,000 for the American Red Cross.

The terrorists attacked the heart of America, but our country responded loudly and strongly, “United we stand.”

In April 2002, ASUI President Kasey Swisher and senators Kevin Smith, Matt Henman and Joel Sturgill resigned after a scandal involving the Gay Straight Alliance. The senators removed a flag belonging to the GSA from the Commons, then returned to the SAE fraternity house where, with Swisher, they attempted to burn the flag. The incident sparked much talk on campus about tolerance and diversity.

The 2001 football season marked the last time UI would have to play most of its home games at Martin Stadium in Pullman. Home games will now be played at the Kibbie Dome.

Construction was ongoing on campus. The J.A. Albertson business building opened in the summer of 2002. Other projects included a new residence hall.

The day of the dead is a traditional Mexican holiday, much like the American holiday of Memorial Day. It is a time when Mexican families remember their dead and the continuity of life.

The celebration usually consists of altars and ceremonial symbols to honor loved ones. Many altars traditionally include flowers to symbolize the brevity of life, candles and favorite foods of the person being remembered.

The UI celebration of the day of the dead involves all of the Moscow community.

The Moscow Farmers' Market draws vendors and shoppers from a 150-mile radius. The market, which celebrated its 25th year, opens every Saturday between the first week in May and the last week in October.

The University of Idaho is no stranger to snow; much of the year is spent in a winter wonderland. Students gather to head out for skiing and snowboarding trips. But for students who can’t afford the trips or don’t have the time, they find their own creative ways to enjoy the snow. In fact many mornings you can wake up and see an array of new interesting and creative “snow sculptures” around campus created by “snow fairies” the previous night.

Gosh Darn Independence week, known more as "God Damn Independence" by students, is a week especially for resident hall students. It is their chance to show their independence from other living groups. Since many resident hall students are freshman and sophomores, it shows their independence from family and parents. During the week the resident halls hold barbecues, athletic competitions and skits.

During Greek Week, Greek students get together to perform skits, sing songs and decorate their houses, all for the sake of competition. Moscow Mardi Gras is probably one of the biggest annual events in Moscow. The streets are filled with people and there's a party on every corner. You may even actually forget you're in Moscow for a few seconds.

Moscow Mardi Gras however is not just two wild nights of chaos and mayhem. During the day and early evenings there is food, music, concerts and contests for people of all ages and walks of life to enjoy.

But beware when night falls — it's time to party and get some beads.

On Mardi Gras night, lines of people stretch for blocks as they wait to get into the bars and businesses holding celebrations.

The Beach entices its Mardi Gras customers with free beer. It also features a wet T-shirt contest that draws many people in, especially those older than 18 but not yet 21 who want to celebrate party style on Mardi Gras.

UI spring break trip participants fill their water bottles at one of the few springs in the area. Water is often hard to find in the desert and one must be prepared to carry enough for a few days at a time.

UI sponsored alternative spring breaks for the outdoors type.

A lot of the time spring break means road trip. For the broke students, taking a drive to a nearby destination is a lot cheaper than a flight to an exotic location.
Lee Hurlbutt takes advantage of the snow as he snowboards down the Delta Tau Delta Hill. Even though it was spring break, many students headed to the mountains for a few more days of fun in the snow.

Those stuck in Moscow for spring break still found a way to escape reality for the week. Of course, for many students, alcohol consumption wasn't something reserved only for special events and breaks.
