There are many shapes that we find in nature everyday.

Some of are large, and some are small.

Some shapes short, and some tall.

Some of these shapes are hiding away from us.

Away and out of sight.

Some shapes as bright as day.

Some shapes dark as night.

Shapes in on the ground,  
and shapes in the sky.

Two lens,  
one oval,  
and six sticks,  
will help us make a fly!

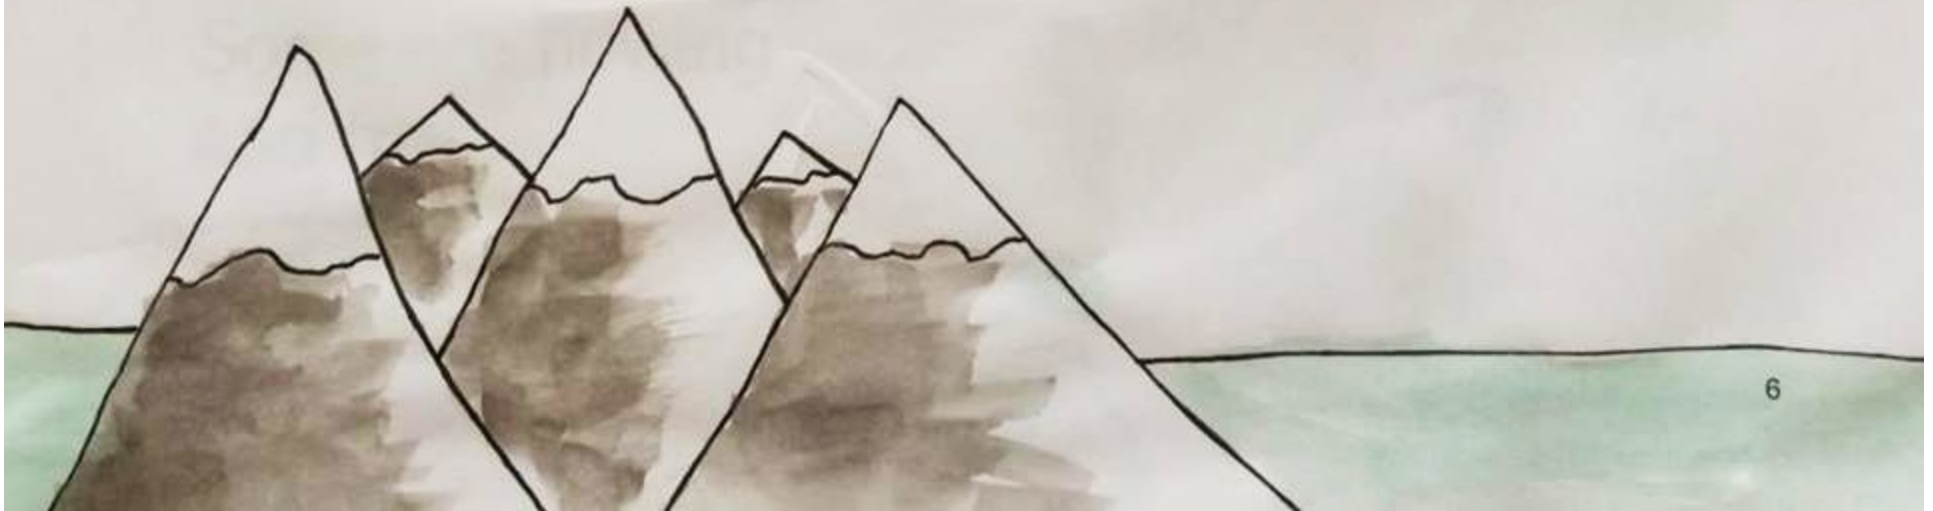

So many complex and  
beautiful shapes in nature.  
It's hard to say just why.

Shapes are everywhere around us,  
In the trees and in the rocks.

Or maybe you see some,  
in the shape of a hill.

And the shape of a mountain,  
there for years still.

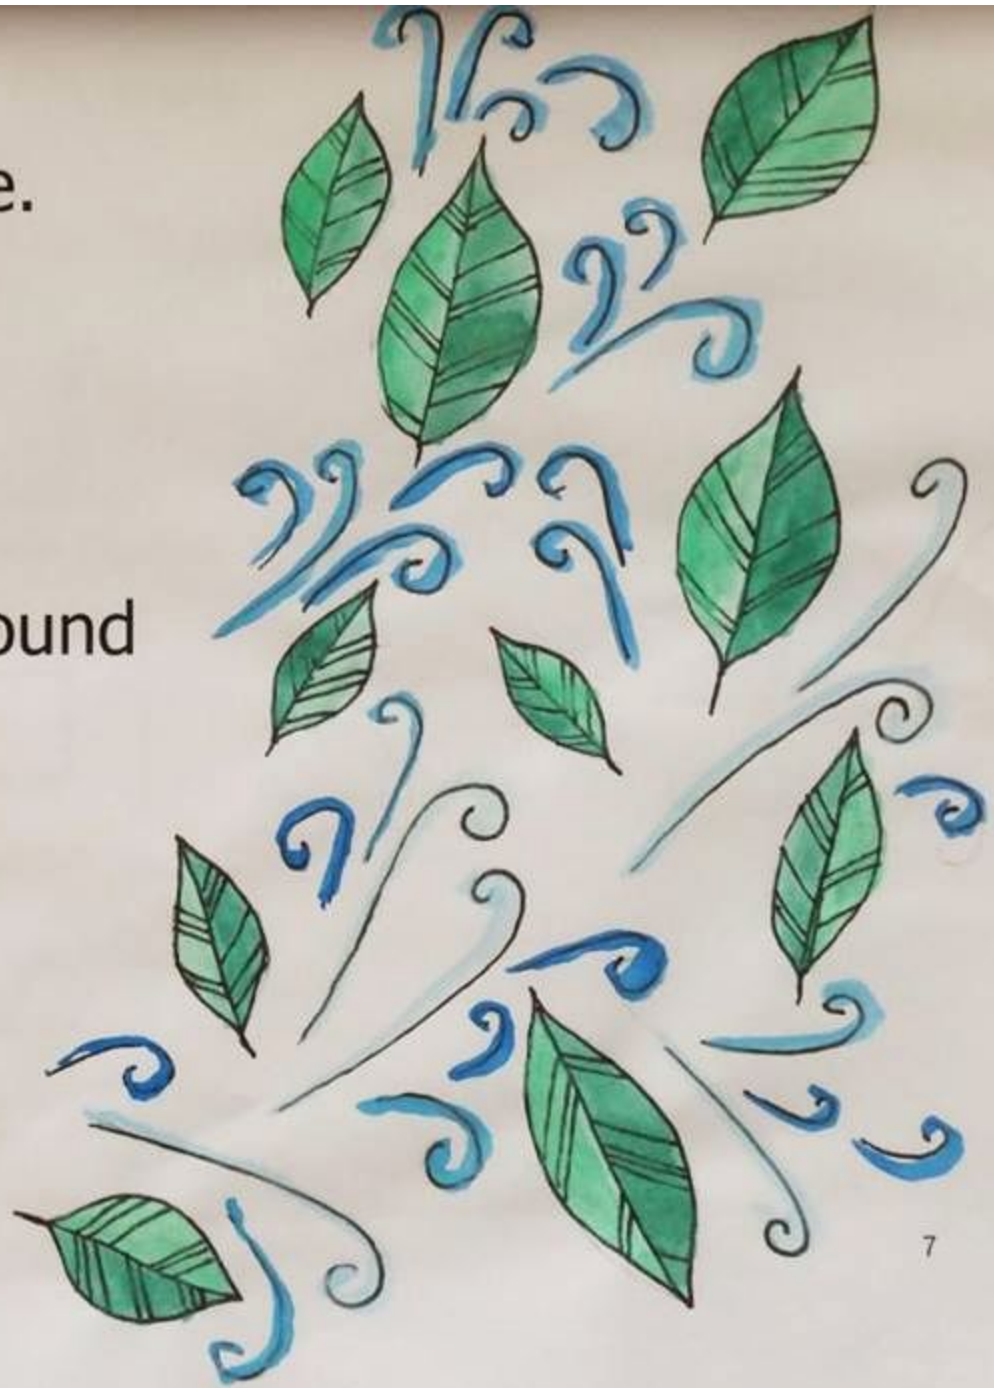

It's hard to say,  
how many you'll see.

Countless shapes,  
forms, and objects.

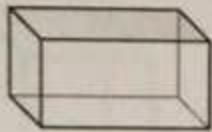

Some shapes are bound  
with lines.

Some are flowing  
and free.

## Idaho State Standards

CCSS. RL.K.1 With prompting and support, ask and answer questions about key details in a text.

CCSS. RL.K.5 Recognize common types of texts (e.g., storybooks, poems).

CCSS. RL.K.7 With prompting and support, describe the relationship between illustrations and the story in which they appear (e.g., what moment in a story an illustration depicts).
