

Esri Educational Site License Program

Esri Educational Site Licenses are designed to maximize productivity and minimize cost in educational institutions where GIS is required by multiple departments. A Site License provides a convenient alternative to establishing multiple Teaching and Research Lab Kits or Teaching Lab Paks in individual departments. A Site License can cover a single campus, multiple campuses, a district, or statewide systems.

An Educational Site License allows an institution to use Esri software throughout the organization for teaching, research, or administrative* purposes for an annual fee. This fee includes software updates and Technical Support Services during the term of the license.

All Educational Site Licenses require a signed contract that specifies the campus location(s) covered by the license. For more details and pricing for your institution, contact the Esri Education Program at educationinfo@esri.com.

* Permitted use of some products is restricted under the Site License Agreement. See the Agreement for details.

Educational Site License Benefits

The Educational Site License program provides educational institutions the right to use select Esri products as follows:

- Products in Tables A1, A2 and A3 may be deployed for the following purposes:
 - Table A1: teaching, research, or administrative purposes
 - Table A2: teaching or research purposes. (Administrative use requires a separate license)
 - Table A3: administrative purposes.

The Educational Site License also provides the following benefits:

- Unlimited access to self-paced e-Learning resources
- Technical Support Contacts
- Complimentary Esri User Conference and Education GIS Conference registrations
