NEWSLETTER

JANUARY

A Wintery Hello!

This semester started out chilly! We have been enjoying the snow but we are dreaming of spring. The MILL has been keeping busy. We have new and returning fan favorite workshops planned. In February we are making mini piñatas on Valentine's Day, no special someone required! Glass etching returns as well! Another exciting workshop will be Getting Started with Raspberry Pi. This is a great starter workshop on what Raspberry Pi is and what can it do.

This semester we also hired two new student eployees and brought our new Mobile MILL online!
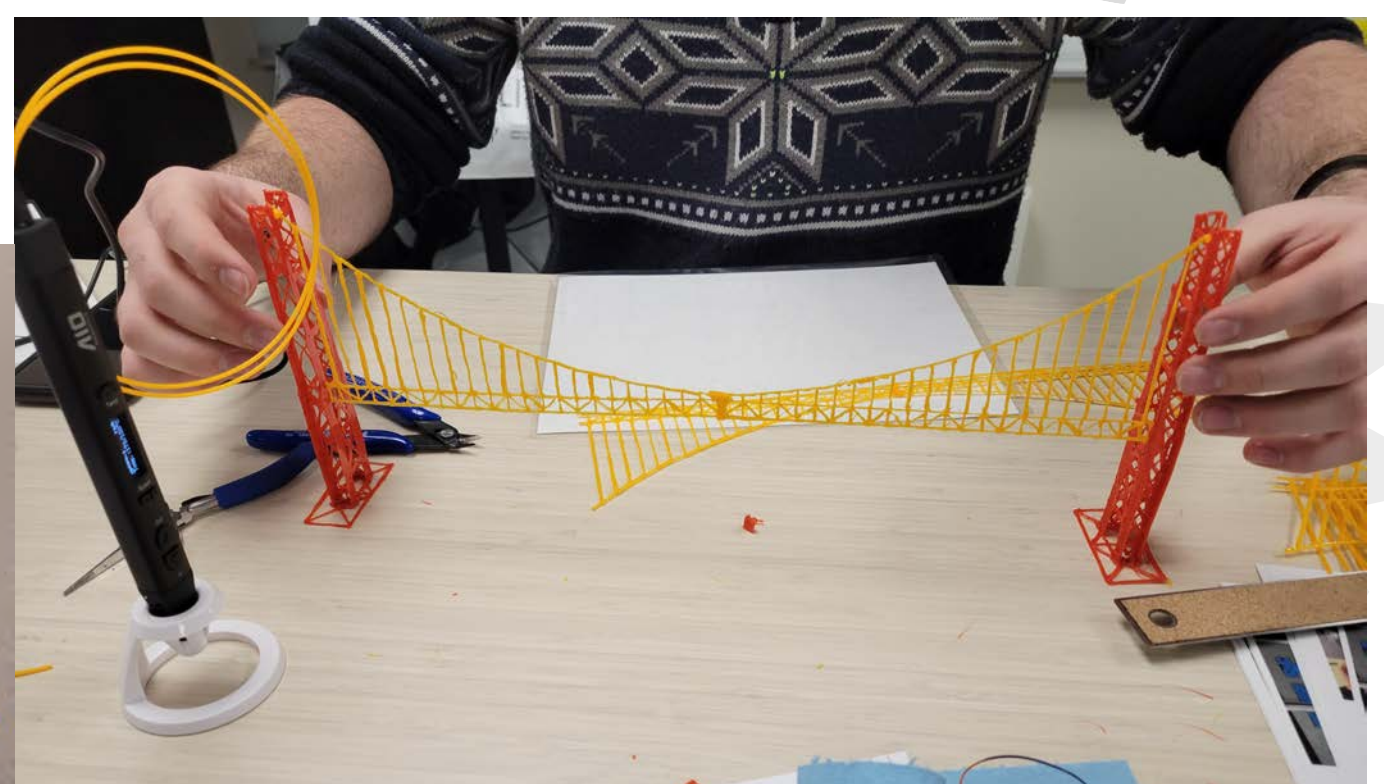

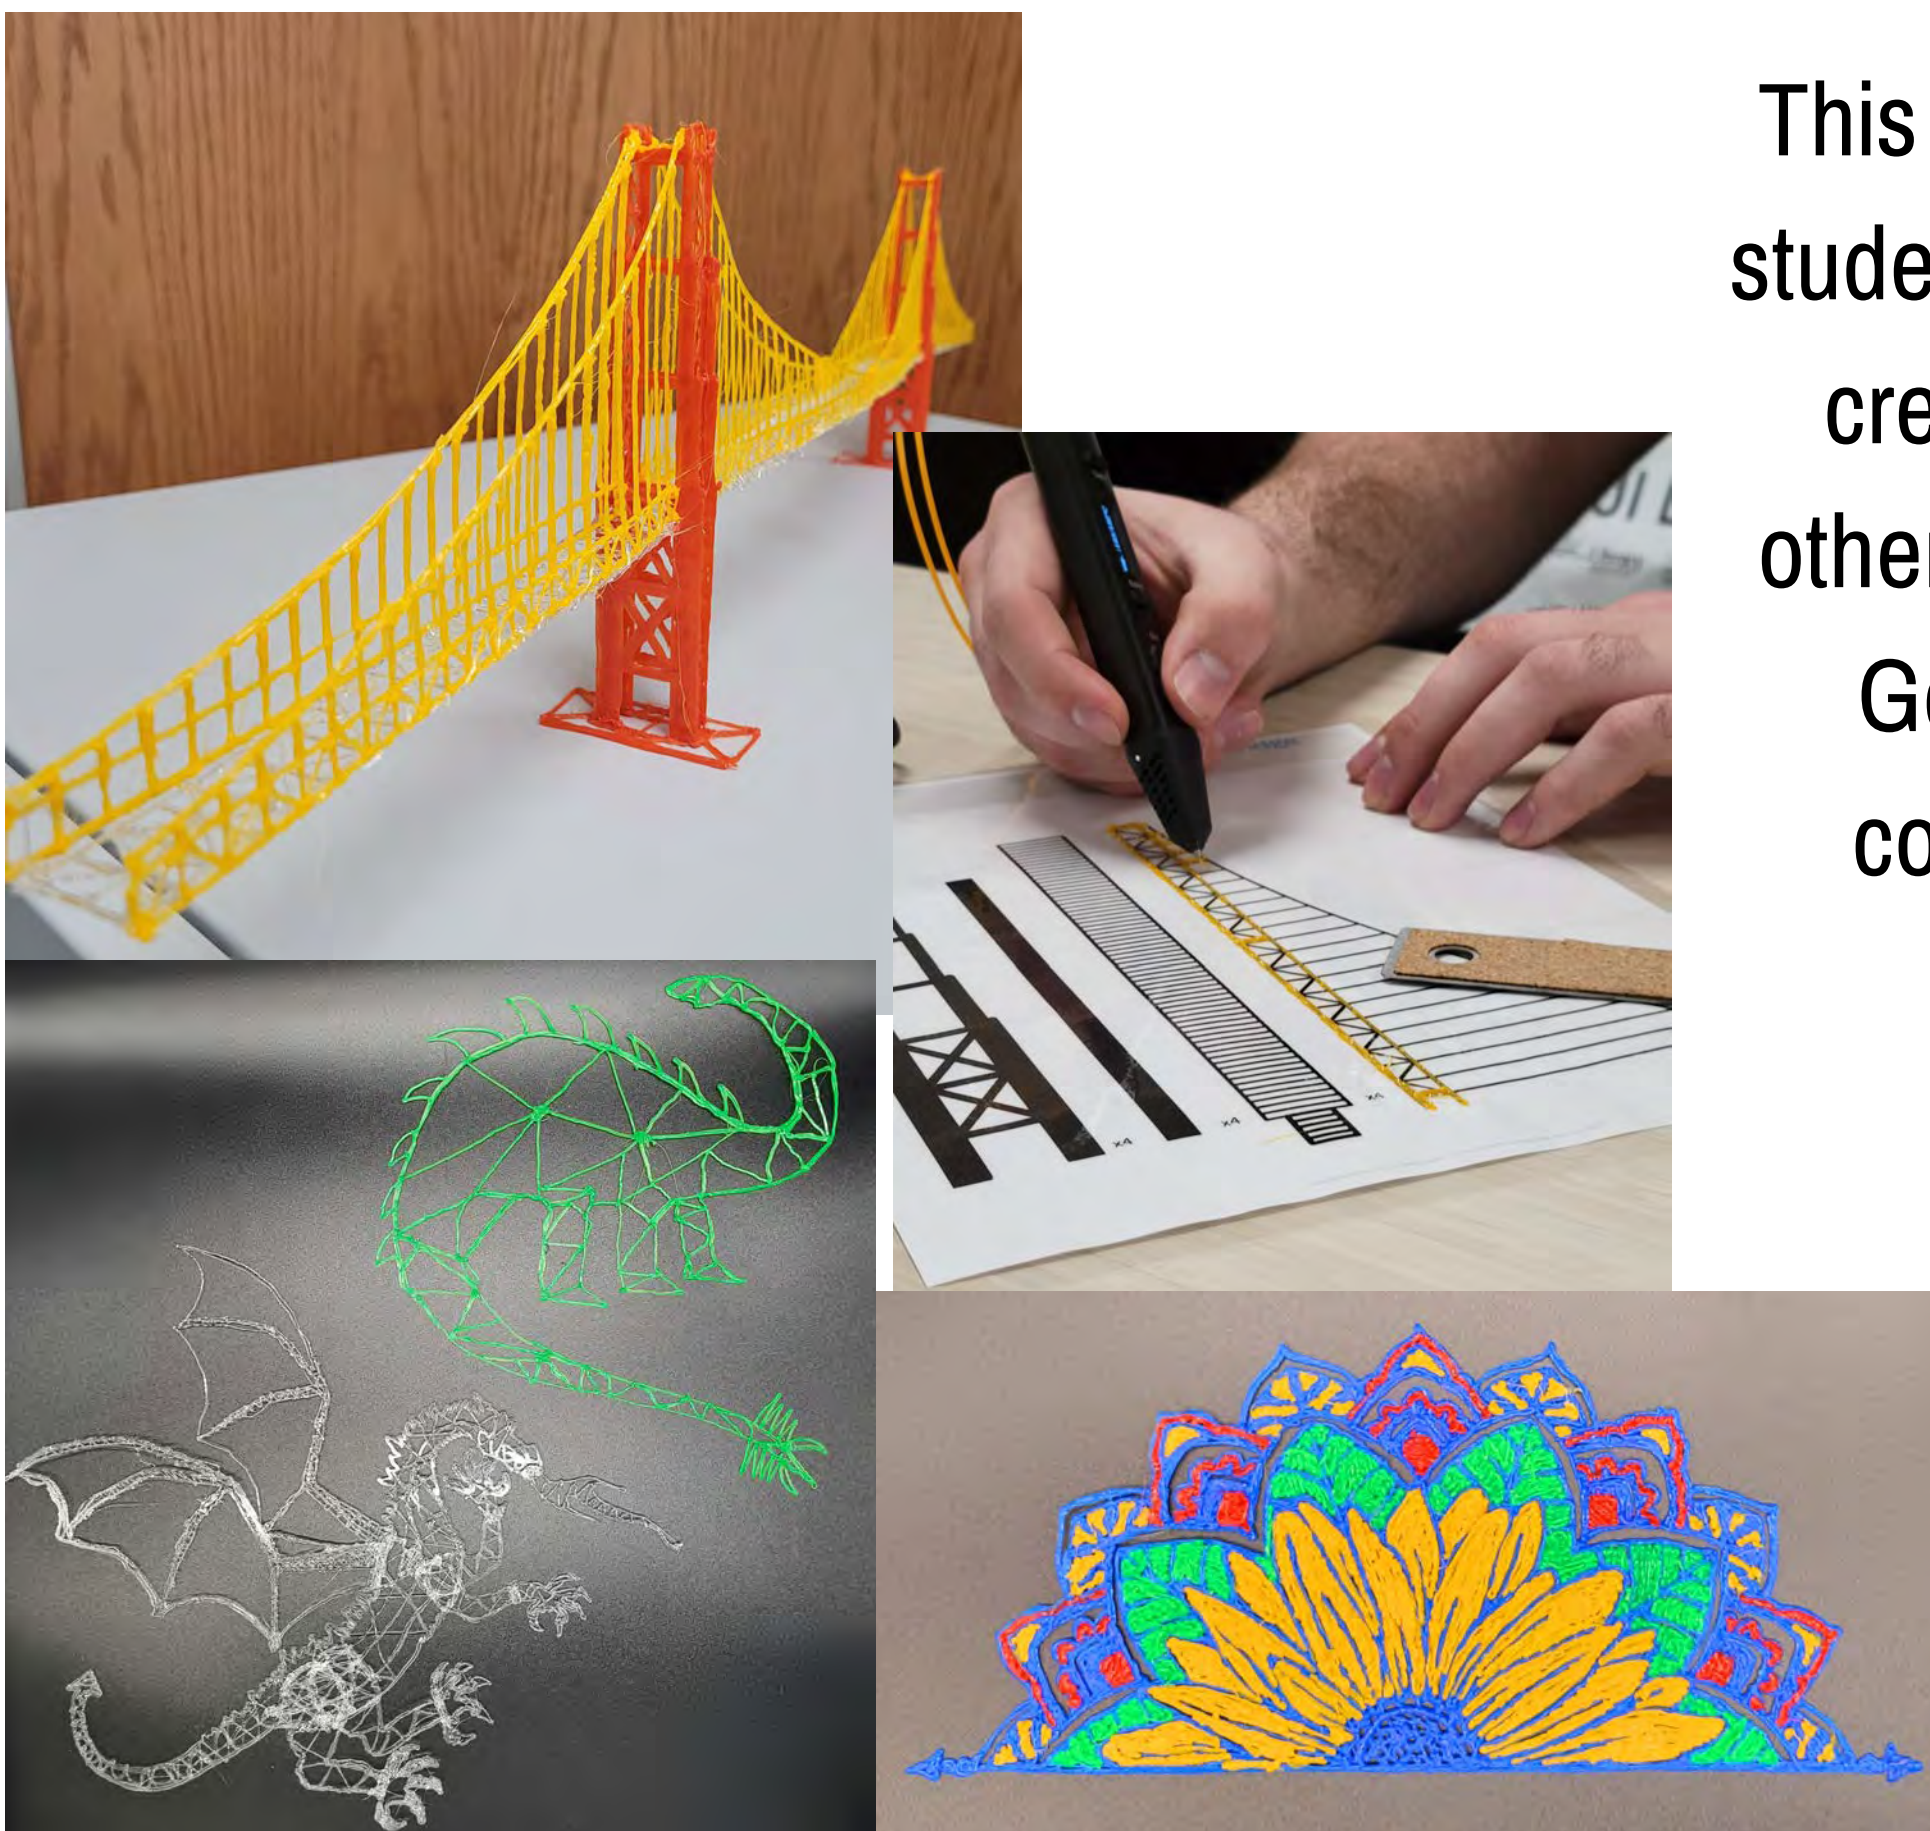

Introduction to Student Workers

Hello! I'm Jordan and I am one of the new student staff members in the MILL. I am majoring in Communication with an emphasis in Natural Resources. I enjoy rock-climbing, mountain biking, and backpacking. My creative outlets include painting, drawing, and DIYing clothes I have thrifted. I have already learned so much working in the MILL like how to use 3D pens, design stickers, and make buttons. I look forward to getting to know all the many students who use this space and learn about all the creative opportunities available in this laboratory.
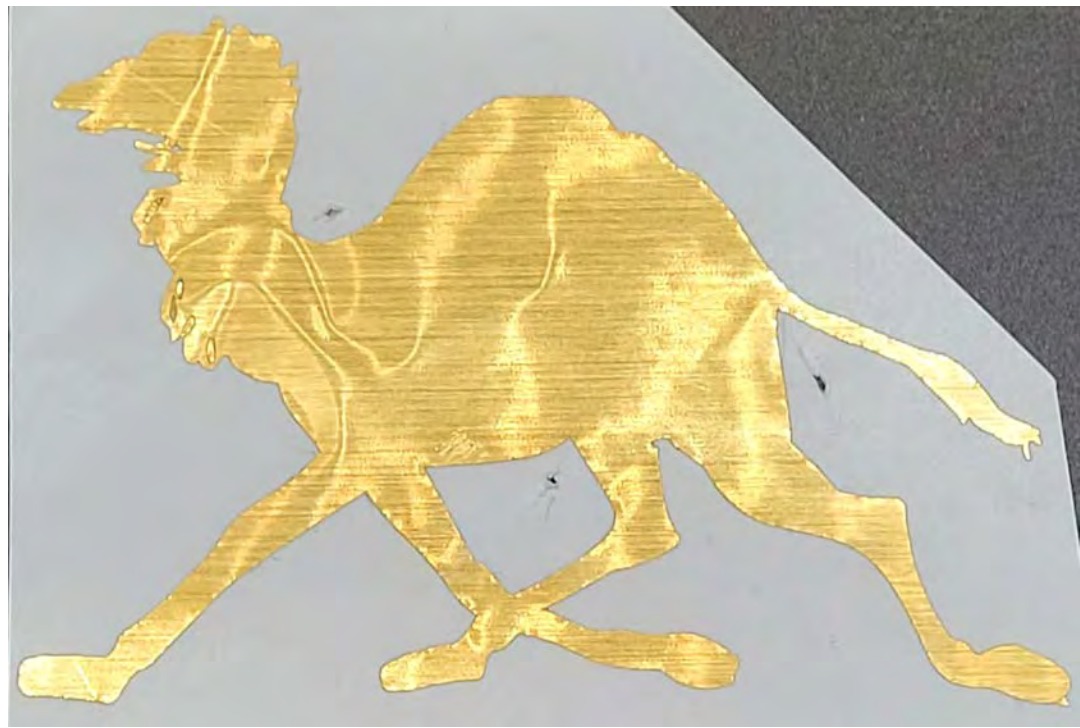

Biweekly Event: 3D Pens

This week the 3D pens were available for students to try out. The fun things you can create with them is almost endless! Our other new worker, Thomas, is making the Golden Gate Bridge! We now have fun colored filament to make each creation even more dazzling.

Make it @ the Mill: Vinyl Stickers

Vinyl Stickers is always a popular workshop. We have had students coming in and learning how to make stickers throughout January. Here are some of the highlights from their creativity.

Mobile MILL News!

This is a project months in the making! The Mobile MILL is a reconfigurable cart giving us the capability to participate and partner at events that are off-site from the MILL's home in the library. This cart has a special 3D printer, vinyl cutter, button maker, and other makerspace kit which can be easily transported around campus. We can't wait to mobilize and meet you out there!

Student Project Highlights

Upcoming Events

Feburary

Make It @ the MILL Workshops

February 3rd - "Make It @ the MILL: Getting Started with Raspberry Pi"
12:30 PM to 1:30 PM

February 14th - "Make It @ the MILL: Mini Piñatas "

12:30 PM to 3:30 PM
