ArcGIS Experience Builder Tool Talk

Bruce Godfrey
GIS Librarian
bgodfrey@uidaho.edu
What is ArcGIS Experience Builder?

• Software-as-a-Service (SaaS) solution for building web apps.
  o Built into ArcGIS Online
• No-code or low-code developer edition options
Open Experience Builder

Drag and drop your favorite apps in any order to customize your app launcher.
Open Experience Builder

• Experience Builder (experience.arcgis.com)
Choose from a variety of designer-made templates.

Select a template to start

- Default
- My templates
- My favorites
- My groups
- My organization
- ArcGIS Online
- Living Atlas
- All
- Blank
- Web AppBuilder classic
- Map centric
- Dashboard
- Web page
- Website
Choose Template – Explore | Preview | Create
Choose Template – Explore | Preview | Create
Add & Connect Widgets

- Drag, position, and configure widgets such as maps, text. Add data, triggers, and actions to make them work together.
Add & Connect Widgets
Add & Connect Widgets
Design Layout

- Change the look and feel of your app by selecting a theme and add a header/footer and more pages or other elements.
Design Layout

Double click to edit text

Audiam salutatus ut ius. Ne malis tollit scriporem sit, mundi verear patrioque etper. Possim temporibus ex vim, vim option facilis iracundiae.
Optimize for Different Screen Sizes
