From Me to Everyone:
Hi everyone! Welcome to the Graduate Student Essentials: Planning and Organizing a Literature Review workshop!
Planning and organizing a literature review

• What is a literature review?
  o An up-to-date or current overview of research on a particular topic
Planning and organizing a literature review

• What is the purpose of a literature review?
  o A literature review “shows readers where the [author] is entering the academic conversation on a particular topic”
    ▪ Identifies gaps in the research
    ▪ Demonstrates that an author understands how their research fits within and expands the body of work on a topic
Planning and organizing a literature review

• What is the appropriate scope for a literature review?
  o How comprehensive does it need to be?
  o Will it include ALL related material regardless of date, or focus only on a specific time frame?
  o Will it include sources from other, related disciplines?
  o Will it include sources written in other languages?

Boston College Libraries. (2020, August 5). *Writing a literature review – Phase 1: Scope of review.*

Planning and organizing a literature review

• How can you organize a literature review?
  o Consider organizing a literature review by:
    ▪ Topic or concept
    ▪ Theory
    ▪ Methodology or method
    ▪ Publication date

• How can you make connections between the sources you find?
  o Summary versus synthesis

• One strategy is to use a **synthesis matrix**
  o “Helps you record the main points of each source and document how sources relate to each other”

Johns Hopkins Sheridan Libraries. (2019, August 14). *Write a literature review: Synthesize*. [https://guides.library.jhu.edu/lit-review/synthesize](https://guides.library.jhu.edu/lit-review/synthesize)
After reading multiple articles, this writer has identified these three major themes.

Planning and organizing a literature review

• When do you stop searching for literature?
  o Searched within all relevant resources
  o Utilized various search strategies and keywords
  o Achieved saturation = seeing the same sources repeatedly
  o Found enough sources to justify that your new research is necessary
Zoom chat box check-in

• Do you have any questions about using a synthesis matrix or when to stop searching for literature?

Share your questions in the Zoom chat box
Utilizing advanced search strategies

- Saving searches and setting search alerts
- Mining author networks
- Conducting citation chaining/searching
Utilizing advanced search strategies

• What are the benefits of “saving searches”?

• What are the benefits of setting search alerts?

• Resources with this functionality include:
  o Web of Science Core Collection
  o Google Scholar
  o ProQuest databases
  o EBSCOhost databases

Utilizing advanced search strategies

• Mining author networks
  o Who is publishing research on a particular topic?
  o Who are their co-authors on related papers?

• Two resources for mining author networks:
  o Web of Science Core Collection
  o Google Scholar

Utilizing advanced search strategies

• Citation chaining/searching is:
  o A strategy in which you use a single source to find related sources

• Citation chaining/searching helps you:
  o Trace the roots of important ideas
  o Discover how a topic has changed over time
Utilizing advanced search strategies

• Two types of citation chaining/searching:
  o Backward citation chaining/searching
  o Forward citation chaining/searching
Utilizing advanced search strategies

• Backward citation chaining/searching:
  o Finding additional sources in reference lists

• Steps for backward citation chaining/searching
  1. Find a source of interest
  2. Determine full-text availability
  3. Examine its in-text citations and reference list
  4. Identify new sources of interest
  5. Determine full-text availability
Utilizing advanced search strategies

• Forward citation chaining/searching:
  o Finding sources that cited your original source

• Steps for forward citation chaining/searching
  1. Find a source of interest
  2. Visit Web of Science Core Collection or Google Scholar
  3. Search for the title of the source
  4. Click “Times cited” (WoS CC) or “Cited by” (GS)
  5. Determine full-text availability
